Forecast for Tuesday 24 Aug 2021

Weather: Dry with clear spells in the early hours, though some mist and fog forming in valleys for a time around dawn. A largely bright and sunny day follows. The best of the sunshine likely to be in the west as some cloud moves into the north east during the afternoon. Remaining dry throughout the day and into the night.

Chance of cloud free mountain/hill tops above 600m: 80% or better throughout the day.

Visibility: Locally poor in valley mist and fog first thing, but quickly improving after dawn. Otherwise, generally very good visibility with clear views of distant hills, and with patchy cloud only occasionally covering slopes around 700-800m (primarily in the north east).

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Although it is towards the end of summer, the sun is still relatively strong and UV levels will be higher as you climb further up. Therefore, it is still advised to take care of your skin in any long sunny intervals.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Wednesday 25 Aug 2021

Weather: Some early patchy fog and mist forming underneath clear skies. This and any associated low cloud clearing to leave a dry morning with sunny intervals and variable amounts of cloud. The cloud again more widespread in the east, but largely clearing over the course of the afternoon to leave a fine evening and night.

Maximum wind: Winds on the summit initially easterly 25mph, transitioning to northeasterly 12mph by the afternoon.

Chance of cloud free mountain/hill tops above 600m: 70% in the morning, rising to 90% in the afternoon.

Visibility: Very poor in any valley mist and fog patches to begin, with some low cloud blanketing slopes beneath 300m as the fog lifts and disperses. Patchy cloud covering higher slopes above 500m for a time through the morning. Very good for the rest of the day as the cloud lifts and clears, with clear views in all directions.

Temperature: **Valleys:** Plus 12 Celsius, rising to plus 22 Celsius.
At 600m: Plus 8 Celsius, rising to plus 13 Celsius.
Freezing level: Above the surface.
